* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
 ** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.

** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
 ** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
 ** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
 ** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
 ** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
 ** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
 ** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
 ** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.

** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.

* It is recommended that in those applications where sintered pads are supplied as Original Equipment, replacement pads should also be of sintered composition.
** To avoid brake imbalance sintered pads fitted in rear calipers should only be used in combination with front calipers containing sintered pads.
